

Analytical Reference Standards

The use and abuse of performance-enhance substances, e.g. anabolic steroids, continues to plague competitive sports. The detection of synthetic steroids is a continuing challenge for analytical laboratories especially because of the availability of numerous of such compounds.

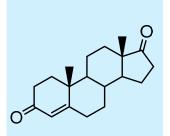

As for other drugs and/or drugs of abuse, there is a major interest to measure steroids in biological samples for sport but also for clinical and forensic cases. To support laboratories involved in the steroid testing, LIPOMED now supply high quality reference standards for the steroids of interest available as ready-to-use calibrated solution and/or as standard pack sizes of 10 mg, 50 mg and 100 mg.

For more information, please check our website www.lipomed.com.

Ordering & other information

LIPOMED is a private Swiss Health Care Company. We are one of the leading companies for Analytical Reference Standards worldwide and specialized in the research, development and manufacturing of ethical pharmaceuticals and products for the treatment of rare diseases.

Since 1993 LIPOMED is dedicated to providing products and services of outstanding quality and expertise. We have our own GMP/GDP and ISO 9001 certified pharmaceutical production facilities in Arlesheim, near Basel. We are also ISO/IEC17025 accredited for testing of Analytical Reference Standards and ISO17034 accredited for the production of Reference Material.

Our innovative products are marketed and distributed with offices and partners in more than 50 countries around the world.

LIPOMED's Analytical Reference Standards currently include the following classes of substances, their deuterated analogues and metabolites, such as Glucuronides and Sulfates:

- » Alcohol & Ethanol Biomarkers
- » Amphetamines & Sympathomimetic amines
- > Antidepressants
- > Antipsychotics
- >> Barbiturates
- >>> Benzodiazepines
- >> Cannabinoids

- >> Cathinones
- >> Cocaines
- Custom Mixtures
- >> Hallucinogens
- >> Opioids
- >> Other CNS Depressants
- Steroids
